

Glossary

Glossary I

Term	Meaning
Record / Paper	A single bibliographic entry with metadata and identifiers.
Canonical identifier	The highest-priority available ID (DOI > arXiv > Semantic Scholar > OpenAlex > title digest) used for de-duplication and citation resolution.
Engine	An independent literature source adapter (<code>{{ENGINE_LIST}}</code>) with a uniform search interface and graceful skip-on-failure.
Subfield	One of the <code>{{N_SUBFIELDS}}</code> configurable keyword-defined buckets (<code>{{SUBFIELD_LIST}}</code>) into which records are classified.
Topic	A latent theme from non-negative matrix factorization over the TF-IDF representation.
Embedding	A deterministic offline vector (TF-IDF $\rightarrow$ truncated SVD) for a title, abstract, or full text.
Hypothesis	One of the <code>{{N_HYPOTHESES}}</code> configured claims about the topic, optionally scored by the knowledge-graph stage.
Assertion	A directional (supports / contradicts / neutral) statement extracted from a record against a hypothesis, with a confidence score.
Nanopublication CAGR	An RDF-serialized assertion plus its provenance. Compound annual growth rate of publication volume (<code>{{CAGR_PCT}}</code>)% for this corpus).
Living literature review	A synthesis that can be re-executed as the field evolves, with every number regenerable.
